CNC Machinist – Miller

Description

Seadub designs, manufactures and reverse engineers components for the yachting industry which includes race boats and Superyachts. We are a family run business looking for a versatile individual with a keen eye for detail. Our day-to-day operations are short production runs and one-offs.

We are adding to our team and currently have a vacancy for a machinist to run a Dugard VMC together with our XYZ Prototrak SMX 3500 CNC Mill on occasion.

This role involves programming (conversational), setting and operating with the Siemens Shop Mill control.

The right candidate will be able to work under their own initiative after a period of settling in.

Experience and knowledge of Fusion 360 essential.

This is a very interesting role for the right person.

Responsibilities

To manufacture components within tolerances specified on drawings

To program the CNC machines from drawings provided

To set up tooling and stock for the job in hand

To monitor machines performance and assess for any maintenance requirements

To keep the machines in a clean and tidy condition

To work as part of a team to get jobs done when required

To record and report time spent on jobs

Skills

Other practical skills considered a bonus eg mechanical maintenance

Diligent, hardworking individual with good attention to detail
